Asunto: Re: Security requirements

Sergio,

Thanks for your feedback. Some questions to make sure we are understanding:

Intercom: is it just for communication purposes (not enabling opening the doors from reception) or that through the phone the main door can be opened?

the intercom system have to include the possibility to open the main door.

Alarm system: we leave the conduits so that the alarm company can cable and install the cameras.

OK. We will contact our current provider (ADT) to inform them about the project.
